

**Accreditation Procedure of Yonsei University
College of Medicine (foreign clinical practise site)**

Decision of the Board of the Hungarian Accreditation Committee (MAB) No. 2023/5/XVII.

The MAB Board supports the accreditation of Yonsei University College of Medicine (Seoul, South Korea) (predecessor institution: Yonsei University Hospital) as a clinical practice site for 5 years until May 26, 2028. The accreditation covers the following specialities: internal medicine, surgery, pediatrics, obstetrics and gynecology, neurology, psychiatry.

Justification:

The key criteria of the simplified procedure were fulfilled by the clinical practice site as follows:

The clinical practice site undertook to train students and indicated the number of students to be admitted. It should be noted that the training center undertook the training of a small number of students (1-4 students per month), considering the large number of students from South Korea. The clinical practice site has made a statement that the profile and capacity of the hospital had not changed compared to the previous accreditation. Excellent feedback was received from students (of Semmelweis University and University of Szeged) completing the internship at the clinical practice site.
