

DECISION

of the Board of the Hungarian Accreditation Committee

No. 2023/6/XVI

The Board supports the accreditation of Okayama University Hospital (Okayama, Japan) as a clinical practice site for 5 years until June 30, 2028. The accreditation covers the following subjects: internal medicine, surgery, pediatrics, obstetrics and gynecology, neurology, psychiatry.

Justification:

The key criteria of the simplified procedure were fulfilled by the clinical practice site as follows:

The clinical practice site undertook to train students and indicated the number of students to be admitted. It should be noted that the training center undertook the training of a small number of students (2 students per subjects), considering the large number of students from Japan. The clinical practice site has made a statement that the profile and capacity of the hospital had not changed compared to the previous accreditation. Excellent feedback was received from students (of University of Debrecen, Semmelweis University and University of Szeged) completing the internship at the clinical practice site
