

DECISION

of the Board of the Hungarian Accreditation Committee

No. 2022/7/IV/2

The Board supports the accreditation of Sheba Medical Center (Tel HaSomer, Israel) as a clinical practice site for 5 years until September 15, 2027. The accreditation covers the following subjects: internal medicine, surgery, pediatrics, obstetrics and gynecology, neurology, psychiatry.

Justification:

The key criteria of the simplified procedure were fulfilled by the clinical practice site as follows:

1. The clinical practice site is the practice site of the Faculty of Medicine at the Tel Aviv University, which ranked 201-250 in the QS Ranking (Medicine) category, thus fulfilling the ranking requirement.
2. The clinical practice site undertook to train students and indicated the number of students to be admitted. It should be noted that the training site undertook the training of a very significant number of students.
3. The clinical practice site has made a statement that the profile and capacity of the hospital had not changed compared to the previous accreditation.
4. Excellent feedback was received from students completing the internship at the clinical practice site. The students only made some constructive comments.
